

# Application form for Pre-MSc Environmental Science Course

## Introduction

The course Pre-MSc bridge course on environmental science is a need based course offered by the department of environmental science and engineering (DESE) for the students with three years of bachelor degree in environmental science and would like to continue MSc course at DESE, Kathmandu University (KU). The course is designed in such a way that the offered courses bridge the credits required to enroll in masters of environmental science course at the department. This is not a separate degree course but after fulfilling the credits of this bridge course, students with three years bachelor degree in environmental science can continue on to study for master degree.

## Courses

Pre-MSc environmental science course consists of 40 credit hours in two semesters and classes are held along with regular third and fourth year bachelor level classes. The courses offered are as follows:

Semester I			Semester II		
Course code	Course title	Credits	Course code	Course title	Credits
ENVS 402	Environmental Impact Assessment	3	MGTS 402	Entrepreneurship Development	3
